# Refresh your home's exterior with United States Seamless® Steel Siding.

Whether you're remodeling or building a new home, United States Seamless' exclusive Platinum Series™ Seamless Steel Siding will provide you with a beautiful, durable and energy efficient exterior that performs better than any vinyl, wood or fiber cement products. This elegant seamless steel siding will provide added value and peace of mind for years to come knowing that your new siding is backed with a fully transferable, lifetime warranty. With our Platinum Series Seamless Steel Siding, you will also receive an unprecedented Lifetime Fade Warranty guaranteeing that your home's exterior will remain the color it was intended to be!

*Elegance* **Strength**  
*peace of mind*

Our exclusive Platinum Series offers you a variety of color combinations and profiles to help you create the home of your dreams. Choose from our beautiful palette of earth tones or select a rich color like Paprika or Pinehurst. Our color perfect finish coordinates with our soffit, fascia and trim accessories. Allowing you to compliment, match or contrast accents creating a unique finish to your home.

## Color and Technology

Keep your home's exterior the color you intended it to be with our Platinum Series Seamless Steel Siding. Most other siding products can fade in just a few short years, but not United States Seamless Platinum Series. We protect your home against excessive fading and chalking by using an exclusive ceramic hybrid paint finish technology enhanced with DuPont™ Teflon® surface protector. This ensures that your home's exterior will retain its rich beautiful color year after year. This unique paint process will give your home a tough, environmentally friendly exterior finish that offers extraordinary longevity. Our Platinum Series finish is also enhanced with Cool Paint Technology™ that uses infrared reflective pigments in the paint to help improve the efficiency of your home.

## Seamless Beauty

United States Seamless steel siding is custom manufactured on site to an exact length enabling professional application teams to wrap your home in seamless beauty all year long. Our siding craftsmen take pride in their work, and you can rest-assured you'll get a beautiful maintenance-free exterior that will be the envy of your neighborhood.

## Maintenance Freedom

Our exclusive ceramic hybrid paint finish enhanced with DuPont™ Teflon® surface protector gives your home's exterior an easy clean, stain resistant finish. By simply rinsing it with a garden hose, you'll keep your siding looking fresh and clean all year long. Free yourself from high maintenance, and spend more valuable time with friends and family. Best of all, you never have to paint or stain your home again!

## Lifetime Investment

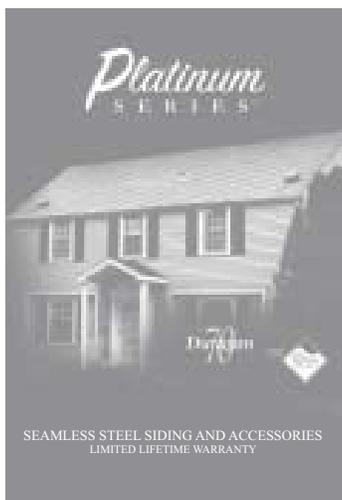

Like most, your home is likely one of your most important investments so choose wisely when re-siding. Our Platinum Series will help your home retain its beauty year after year, and will add value. According to "Remodeling" magazine, on average 103% of re-siding costs will be recovered upon the sale of a home (Remodeling magazine 2006 Cost vs. Value Report). There is nothing like the strength of steel to protect your home from the harsh elements. Arctic temperatures, blasting winds, hailstorms and the hot sun are no match for United States Seamless.
